ABOUT

I am a learner, currently pursuing B.E. in I.T. Over the course of my learning, I have developed skills such as frontend designing, web development, file handling and many more. Willing to work, I am looking forward to gain more skills while contributing to the success of the company and to my individual growth.

PROJECTS

KRISHI** [IOT, ML, AI, Data Fetching, Django, Firebase]
• A real time IOT based web application that uses different sensors to detect environmental factors in order to recommend crop, alternative crop, fertilizer using ML.
• Allows camera to capture the image and predict the disease with deep learning.
• Involves AI based chatbot consultancy. Additional feature of news audio system in local languages using data fetching & data science.
• E-commerce platform for farmers and fertilizer merchants to buy/sell products using Django and firebase.

HIQ - HIGH QRIOSITY [React Js, Node Js, MySQL]
An online platform for bookstores to sell books, promoting their business. User can buy and pay for books using payment gateway.
